A tender is now open for the attribution of a Research Grant under the project “TEX4WOUNDS - Desenvolvimento de materiais têxteis avançados para tratamento de feridas” (n.º POCI-01-0247-FEDER-047029), Funded under the Incentive System for Research and Technological Development, R&DT Projects in Co-Promotion (Notice 17/SI/2019), to be developed by the company SOMANI in co-promotion with non-business entities of the CITEVE R&I System and The Centre for Interdisciplinary Research in Health (CIIS), of the Instituto de ciências da Saúde of Porto, Catholic University of Portugal and with the company FOURMAG, under the following conditions:

Scientific Area: Nursing

Admission requirements:

Applicants for the Research scholarship must, on the application date, be enrolled, or present proof of conditional enrollment in a PhD in the scientific area of Nursing. Candidates must have completed a degree with a minimum average of 15 values and a master's degree with a minimum average of 15 values in the scientific area of Nursing, Advanced Nursing or Nursing Sciences. The candidate must show interest in the scientific area and be able to develop teamwork, in a multidisciplinary and multicultural environment. It is essential that candidates have a good command of the English language and have research experience.

Preferred factors will be considered, the experience in the area of Community Health and Public Health Nursing, Medical-Surgical or Mental Health and with projects related to tissue viability and wound treatment. Preferred factors will also be considered the experience in research projects and evidence from international scientific publications.

Work plan:

Taking into account the context and the social and economic impact of wounds on users, caregivers and health systems, as well as the technological evolution, cost, constraints and difficulties of using dressing materials already described, the TEX4WOUNDS consortium intends to develop a range of

advanced devices that provide an effective and cost-effective response in wound care. The TEX4WOUNDS project has as a global objective a range of products for cleaning and wound care, based on new textile architectures, resorting to plush warp mesh structures, and functional fibers and natural additives for impregnation.

The Research Fellow will participate in all project tasks, from literature review to research data collection, analysis and writing articles for peer-reviewed international journals.
